FOR IMMEDIATE
RELEASE

eProcessing Network Offers Secure, EMV Processing for SMBs

The Leading Payment Gateway is now EMV-Certified Through the TSYS Processing Platform

HOUSTON, Texas, March 30, 2017 — eProcessing Network, LLC (ePN) is pleased to announce that it has been certified by TSYS to accept and process EMV™ transactions with the Castles Technology MP200 terminal. TSYS is a leader in providing EMV expertise and merchant support to the payment processing industry and has certified with eProcessing Network (ePN) to offer real-time EMV capabilities to the ePN merchant base.

Certification through the TSYS Merchant Platform includes Retail and PIN Debit transactions, allowing merchants to process both contact and contactless transactions for Visa®, MasterCard®, Discover® and American Express® payments. eProcessing Network will continue to update and provide APIs for ISVs and other developers to integrate ePN into their applications. Developers benefit with ePN integration because eProcessing Network helps them remove their system and/or software from PCI scope and other compliance requirements.

“We are excited for the EMV certification of eProcessing Network to TSYS platforms,” said John Badovinac, director of developer partnerships for TSYS’ Merchant Services segment. “This allows ePN to offer EMV support and value-added services to their customers, increasing the quality of the overall consumer experience, while providing advanced security features to guard against card fraud.”

“eProcessing Network is committed to partnering with leading processors like TSYS to help provide our ISO/MSP partners with the secure solutions that can further minimize the risk of fraud for their merchants,” said Steve Sotis, President of eProcessing Network. “These first generation ePN EMV solutions help merchants accept EMV payments now, and can assist them as they migrate into the future of contactless payments, end-to-end encryption and tokenization.”

About eProcessing Network, LLC

eProcessing Network (ePN) is a software development company specializing in secure, real-time transaction processing services, solutions and support for all small to mid-sized merchants. Headquartered in Houston, Texas, ePN is certified to process a comprehensive suite of electronic payment transactions through all major credit & debit card, check/ACH and gift card/loyalty processors, and sells its services and products exclusively through Resellers and ISO sales channels. eProcessing Network is a registered Visa USA® and MasterCard® Third-Party Service Provider and is compliant with PCI and PA-DSS Data Security Standards.
