FOR IMMEDIATE RELEASE

eProcessing Network Now Offers Equinox Payments Secured Technology to Bring Retail Merchants the Next Generation of Payment Functionality.

Combining the strength of ePN's Secure Payment Gateway with the robust performance of Equinox Payment Devices.

HOUSTON, Texas, April 17, 2012— eProcessing Network, LLC, (www.eprocessingnetwork.com), the leading independent payment gateway and software development company in the Electronic Payment Processing Industry, announced today that it has partnered with Equinox Payments (formerly known as Hypercom) to integrate next-generation payment terminals with ePNRetail software. In a continued effort to support the small to mid-sized retail merchant, eProcessing Network now features – among other Equinox payment devices – the Equinox L5300, a state-of-the-art, customer-facing, payment terminal that gives the user the ultimate experience with color, touch-screen capabilities, PIN debit, signature capture, and capabilities to move the merchant into the future of contactless payments. Since both the ePN Secure Payment Gateway and the Equinox L5300 are certified to be in compliance with PCI Security Council standards, retail merchants can be confident that they will be able to transact with the highest levels of security.

Additional features of the L5300 include superior high-resolution, color, touch-screen capabilities that prompt the user for their signature and allow the merchant to display customer purchases, and the large, easy-to-use buttons on the key pads greatly reduces the errors of bad PIN entry. These advanced capabilities used seamlessly with the ePN Secure Payment Gateway help ensure that merchants can provide their customers with a user-friendly, interactive experience.

“Having the opportunity to offer retail merchants the advanced technology that Equinox Payments provides in each of their payment devices helps us meet the demands of a rapidly growing market,” says Steven Sotis, President of eProcessing Network. “At ePN, we’re excited for what the future holds for the retail merchant and we’re poised to effectively support their usage with the products that will help propel their business.”

Adds Kris Brown, Sales Channel Development Manager for ePN, “providing our resellers with the ability to offer their merchants state-of-the-art solutions that enhance the customer experience and enable them to take their business to that next level is why our partnership with Equinox Payments is so advantageous.”

About eProcessing Network, LLC

eProcessing Network (ePN) is a software development company specializing in secure, real-time transaction processing services, solutions and support for all small to mid-sized merchants. The eProcessing Network Payment Gateway processes transactions using each merchant’s own merchant account. Headquartered in Houston, Texas, ePN is certified to process a comprehensive suite of electronic payment transactions through all major credit card, check/ACH and gift card/loyalty processors, and sells its services and products exclusively through the ISO sales channel. eProcessing Network is a registered Visa USA® Third-Party Service Provider and is compliant with PCI and PA-DSS Data Security Standards.
