eProcessing Network Integrates Three Epson Mobile POS Printers for the Mobile Market

SMBs can use the ePNMobile Tablet for iOS & Android with the Portable Printer
for Complete Mobile Processing

HOUSTON, Texas, February 9, 2015 — eProcessing Network, LLC (ePN), the leading independent payment gateway and software development company in the Electronic Payment Processing Industry, today announced integration of Epson's TM-T20II Ethernet, Bluetooth and WIFI printers with its ePNMobile for Tablet iOS and Android Applications. ePN understands that mobile merchants need the option to offer printed receipts to their customers, and the Epson printer provides them with a fast, reliable and affordable portable solution.

The Epson TM-T20II series – with Bluetooth, WIFI and Ethernet compatibility – easily integrates with the ePNMobile for Tablet iOS and Android, eProcessing Network's secure, cloud-based application. The tablet-friendly POS printer is designed to work right out of the box, and features print options that enable merchants to reduce paper usage up to 30%, without compromising readability. The Epson printers meet the latest industry-standard, wireless security protocols – just like the ePNMobile for iOS and Android Tablet Applications.

"eProcessing Network has been a valued partner throughout the integration process," said Tom Kettell, director of Commercial Channel Sales at Epson. "The company's commitment to quickly bring connectivity to their resellers and diverse merchant base reinforces their dedication to exceeding the needs of the mobile merchant."

"With mobile transactions increasing at such a rapid pace, it's important to ePN to provide merchants with solutions and connectivity to devices," added Steve Sotis, president of eProcessing Network. "With the Epson integration, we can now offer the mobile merchant a complete and secure transaction processing solution, allowing them to succeed in today's market and offer their customers a complete user experience."

About eProcessing Network, LLC

eProcessing Network (ePN) is a software development company specializing in secure, real-time transaction processing services, solutions and support for all small to mid-sized merchants.
